Dear Dr Waters

**REQUEST FOR FURTHER INFORMATION ON ROUNDUP READY SOYBEAN EVENT
40-3-2**

Further to our telephone conversation yesterday I am writing to confirm our request for further information on the above soybean event.

Experts from our Advisory Committee on Novel Foods and Processes and Advisory Committee on Animal Feedingstuffs would like to see the sequence of the 72bp fragment and its flanking sequences which are contained within a 937bp Hind III fragment. They have also requested that computer analysis be carried out on this 937bp sequence to predict any possible fused protein expression.

We would appreciate if you could provide us with this information as a matter of priority.

Yours sincerely

Dr Clair Baynton
