

Nutrition research

The FSA is responsible for some nutrition policy in Northern Ireland along with the Department of Health.

To help develop and inform nutrition policy, the FSA commission research to understand what consumers are eating, what food they are buying and their thoughts and knowledge on healthy eating and nutrition. This research is shared widely with our stakeholders.

Food and drink consumption

National Diet and Nutrition Survey

The National Diet and Nutrition Survey Rolling Programme is a continuous cross-sectional survey, designed to assess the diet, nutrient intake and nutritional status of the general population aged 1.5 years and over living in private households in the UK.

Food and drink shopping

Kantar

The FSA commissioned Kantar Fast Moving Consumer Goods Purchase Panels (Kantar) to provide Northern Ireland purchasing data. Kantar collects data on all food and drink purchases brought into the home (including in store and online shopping).

Food Poverty

The Cost of a Healthy Food Basket

The FSA have a role in monitoring food insecurity. Since 2014, [safefood](#) and the FSA have presented the cost of the minimum essential food basket for four household types every two years, adjusted to reflect food costs at that time. These reports demonstrate the average weekly cost of healthy food and the level of household income that may need to be spent on attaining this minimum standard.

Consumers attitudes, knowledge and behaviour towards food

Food and You 2

Food and You 2 is our flagship survey with consumers in England, Wales and Northern Ireland. The research is conducted biannually and covers topics such as food safety in the home, food shopping, eating out, food security, healthy eating, concerns about food, and trust in the FSA and food supply chain.

Making Food Better

This research is commissioned by the FSA as part of the Making Food Better programme. The programme aims to support Northern Ireland food businesses to make the food environment healthier through reducing calories, saturated fat, sugar, and salt in the food they produce, sell or serve, reducing portion size, providing nutritional information and delivering responsible promotions.

Eating Well Choosing Better Tracking Survey

This survey monitors consumer understanding and knowledge of recommended daily calorie intake, use of traffic light labels, attitudes towards reformulation and calorie information and awareness of campaign communications delivered by the Food Standards Agency in Northern Ireland.

Food and Drink Manufacturers View on Front of Pack Nutrition Labelling

The FSA commissioned independent research to explore the views of food and drink manufacturers in Northern Ireland on front of pack nutritional labelling including the impact of this

labelling on manufacturers reformulation efforts.
