

# Update: Lidl GB recalls Starovice Czech Lager 5.0% because of undeclared sulphur dioxide

Lidl GB is extending the recall of Starovice Czech Lager 5.0% to include additional date codes because it contains sulphur dioxide which is not mentioned on the label. This means the product is a possible health risk for anyone with a sensitivity to sulphur dioxide and/or sulphites.

## Product details

### Starovice Czech Lager 5.0%

|             |                                                |
|-------------|------------------------------------------------|
| Pack size   | 500ml                                          |
| Best before | All dates up to and including 23 December 2022 |

## Risk statement

**Allergen(s):** Sulphur Dioxide

This product contains sulphur dioxide, making it a possible health risk for anyone with a sensitivity to sulphur dioxide and/or sulphites.

## Action taken by the company

Lidl GB is recalling the above product from customers and been advised to contact the relevant allergy support organisations, which will tell their members about the recall. The company has also issued a point-of-sale notice to its customers. These notices explain to customers why the product is being recalled and tell them what to do if they have bought the product. Please see the attached notice.

## About allergy alerts

Sometimes there will be a problem with a food product that means it should not be sold. Then it might be 'withdrawn' (taken off the shelves) or 'recalled' (when customers are asked to return the product). Sometimes foods have to be withdrawn or recalled if there is a risk to consumers because the allergy labelling is missing or incorrect or if there is any other food allergy risk. When there is a food allergy risk, the FSA will issue an Allergy Alert.
