## Risk statement

The products listed above might be contaminated with *Listeria monocytogenes*.

Symptoms caused by this organism can be similar to flu and include high temperature, muscle ache or pain, chills, feeling or being sick and diarrhoea. Some people are more vulnerable to listeria infections, including those over 65 years of age, pregnant women and their unborn babies, babies less than one month old and people with weakened immune systems.

## Action taken by the company

Lactalis McLelland Ltd is recalling the above products. Lactalis McLelland Ltd and Co-op have issued point-of-sale notices to their customers. These notices explain to customers why the products are being recalled and tell them what to do if they have bought the products. Please see the attached notices.

## Our advice to consumers

If you have bought any of the above products do not eat them. Instead, return them to the store from where they were bought for a full refund.

## About product recalls and withdrawals

If there is a problem with a food product that means it should not be sold, then it might be 'withdrawn' (taken off the shelves) or 'recalled' (when customers are asked to return the product). The FSA issues Product Recall Information Notices to let consumers and local authorities know about problems associated with food. In some cases, a 'Food Alert for Action' is issued. This provides local authorities with details of specific action to be taken on behalf of consumers.
