

FSA Small and Micro FBO Tracking Survey

Area of research interest: [Behaviour and perception](#)

Study duration: 2019-09-01

Planned completion: 1 February 2021

Project status: Completed

Conducted by: BMG Research

About this research

This is an annual tracking survey of food organisations (FBOs) with up to 49 employees across all their sites in England, Wales and Northern Ireland.

The aims of the survey are to:

- To better inform insights on the UK's EU exit and engagement with small and micro FBOs
- To 'unpack' attitudes towards regulation to deepen insights and knowledge of small and micro food businesses
- To measure trust in the FSA and extent to which FSA is considered an excellent, accountable and modern regulator
- To explore any other issues as required
