

Update 2 - Organism recalls Eggshell Membrane Capsules because of contamination with Salmonella

Organism is recalling Eggshell Membrane Capsules, because Salmonella has been found in the product.

Reason for Update 1: This update is to make consumers aware that the Salmonella found in this product has been linked to human illness after consumption of the product. The Salmonella found is resistant to several antibiotics, therefore particular disposal routes are required.

Reason for Update 2: This update is to make consumers aware of additional online platforms selling this product. The product is sold on Amazon and on the Organism website.

Product details

name: Organism Eggshell Membrane Capsules

Pack size	60 capsules, 500mg per serving
Batch code	all

Risk statement

The presence of Salmonella in the products listed above.

The Salmonella found produces extended-spectrum beta-lactamase (ESBL), and is resistant to several antibiotics, (fluoroquinolones, tetracycline and Fosfomycin), making it more difficult to treat. Inaccurate disposal of the product could cause wider public health, animal health or environmental risks therefore it is important to ensure you follow the advice on how to safely dispose of the product provided below.

Symptoms caused by Salmonella usually include fever, diarrhoea and abdominal cramps.

Public Health Authorities advise if you have consumed this product and have any concerns, you should seek advice from healthcare professionals, using the most appropriate route depending on where you live, (i.e., visit your GP, call NHS111). Even if you feel well, return of the product is essential so that it can be disposed of in a way that does not contaminate the environment and put others at risk. Do not dispose of this product in household waste or flush the capsules down toilets.

Action taken by the company

Orgenism is recalling the above product. Amazon and Orgenism sales of this product have stopped. A point of sale notice will be displayed on Orgenism website. These notices explain to customers why the product is being recalled and tell them what to do if they have bought the product. Please see the attached photo of the product.

About product recalls and withdrawals

If there is a problem with a food product that means it should not be sold, then it might be 'withdrawn' (taken off the shelves) or 'recalled' (when customers are asked to return the product). The FSA issues Product Recall Information Notices to let consumers and local authorities know about problems associated with food. In some cases, a 'Food Alert for Action' is issued. This provides local authorities with details of specific action to be taken on behalf of consumers.
