Action 6 - Performance Report Q4 2024-25 (FSA BC 25/06/04)	Nathan Barnhouse to consider what analysis can be added to slide on LA FTE resource.		Once the resource tool is in use this will enable the FSA to re-evaluate the ratio of officer to establishment, and set more accurate milestones, which will be based upon a consistently derived figure for resource needed and resource in post, which can be compared with establishment level performance data supplied by LAs once the LA data project is fully operational. This will allow us to evidence how under resourcing impacts on service delivery. We will then be able to present information at national level, and also allow us to indicate the percentage of individual LAs who are attempting to operate at sub optimal level of staff with a high degree of certainty.
