

# Hoffmans Foods recalls Chopped Herring because of undeclared egg and sulphites

Hoffmans Foods is recalling Chopped Herring because it contains egg and sulphites which are not mentioned on the label. This means the product is a possible health risk for anyone with an allergy or intolerance to egg and/or a sensitivity to sulphur dioxide and/or sulphites.

## Product details

### Hoffman's Chopped Herring

Pack size	150g
Batch code	21098
Use by	13 May 2021
Allergens	Egg, Sulphur dioxide and/or sulphites

## Risk statement

**Allergen(s):** Egg and sulphur dioxide and/or sulphites

This product contains egg and sulphites making it a possible health risk for anyone with an allergy or intolerance to egg and/or a sensitivity to sulphur dioxide and/or sulphites.

## Action taken by the company

Hoffmans Foods is recalling the above product from customers and has been advised to contact the relevant allergy support organisations, which will tell their members about the recall. The company has also issued a point-of-sale notice. These notices explain to customers why the product is being recalled and tell them what to do if they have bought the product. Please see the attached notice.

## Our advice to consumers

If you have bought the above product and have an allergy or intolerance to egg and/or a sensitivity to sulphur dioxide and/or sulphites, do not eat it. Instead return it to the store from where it was bought for a full refund.

## **About allergy alerts**

Sometimes there will be a problem with a food product that means it should not be sold. Then it might be 'withdrawn' (taken off the shelves) or 'recalled' (when customers are asked to return the product). Sometimes foods have to be withdrawn or recalled if there is a risk to consumers because the allergy labelling is missing or incorrect or if there is any other food allergy risk. When there is a food allergy risk, the FSA will issue an Allergy Alert.
