

FHRS consistency exercises

These exercises, originally presented to local authorities as a national consistency exercise, are based around food business inspection scenarios. They can be used as a team exercise or by individuals to work through and give the businesses a food hygiene rating. They may be especially useful for student and newly qualified officers, or those returning to food safety and hygiene enforcement.

There are currently three consistency exercises available:

- [Exercise 1 \(2015\): The Carib Bayou restaurant?](#)
- [Exercise 2 \(2016\): The Old Forge Guesthouse?](#)
- [Exercise 3 \(2017\): Papa's Pizza & Burgers mobile trader?](#)

Each exercise will contain links to relevant information and background. You will need to consider each section as fully as possible so you are familiar with the scenario before scoring.
