## ACTIONS FROM PREVIOUS MEETINGS

Index	Action	Due Date	Owner and progress to date
Action 3 - (FSA 20/03/03)  Chief Executive’s Report to the Board	To provide an update on evidence relating to CBD and consumer safety at the halfway point in the 12-month period.	16 September	Rebecca Sudworth  <b>In Progress:</b> The Committee on Toxicity (COT) continue to keep the evidence relating to CBD safety under review. At the end of July, the Committee published a position paper summarising their current opinion on the potential risk of CBD in food products. Having reviewed this information, the FSA advice to consumers on CBD safety in foods remains unchanged. We continue to advise consumers to think carefully before taking CBD and as a precaution for healthy adults to not take more than 70mg a day unless a doctor agrees (this is about 28 drops of 5% CBD). We also recommend that those taking medication, or

			<p>those who are pregnant or breastfeeding to not take CBD.</p> <p>The FSA continues to receive enquiries from industry about their novel food applications. We have continued to have productive discussions with industry about a range of novel food dossiers for different types of CBD food products. This includes a number of requests from industry for informal advice on dossiers that are proposed to be formally submitted to the UK from January next year with the aim of meeting our deadline of the end of March 2021 for validated applications. Some are already in a very good condition and are very close to the standard required for validation, if we were allowed to do so now.</p>
<p>Action 6 - (FSA 20/03/08)</p> <p>Beef Burgers Served Less Than Thoroughly Cooked: Update</p>	<p>To provide update to Board Members on the outcome of the consultation on the proposed revision to the guidance on less than thoroughly cooked burgers and on the additional level of assurance about the triggers, controls, and the ability to monitor and implement them.</p>		<p>Rebecca Sudworth <b>Paused due to Covid-19</b></p> <p>Public consultation on the updated guidance has been delayed due to the Covid-19 pandemic. Key stakeholders who use the guidance, including local authorities and food businesses, are unlikely to be able to respond to a consultation during these unprecedented times. The position will be regularly reviewed and a consultation launched when appropriate. In the meantime, the first draft of the updated guidance has been circulated to internal colleagues for comment and a Business Impact Assessment is underway. Work on triggers to monitor and provide assurances that control are being applied effectively has also been delayed due the COVID-19 pandemic. Work will begin again as resources become available.</p>

<p>Action 4 - (FSA 20/01/08) Food Hypersensitivity Strategy</p>	<p>Provide a future Board meeting with specific advice on food businesses that presented particular risks to 16-24 year olds, and actions to help mitigate those risks and assist businesses in understanding and meeting their legal obligations.</p>		<p>Rebecca Sudworth <b>Paused due to Covid-19</b></p> <p>Work to engage FBOs is still on hold whilst we continue to establish our engagement strategy within the constraints of the covid19 environment. However, we have initiated further work on the Young People campaign and are embarking on some further testing with the audience to ascertain how ordering online and via delivery affects how/if they ask for allergen information. This is particularly relevant in the current climate. We will subsequently test a number of creative approaches. The aim is to deliver this activity in Feb 2021.</p> <p>Whilst the above work is on-going, we will be in a position to report to the Board in October.</p>
<p>Action 5 - (FSA 20/01/08) Food Hypersensitivity Strategy</p>	<p>To include information about progress towards an 'at-a-glance' scheme for allergen information provision in future Allergens Update paper.</p>		<p>Rebecca Sudworth <b>In progress</b></p> <p>Work has progressed with an initial scoping meeting held in July with stakeholders across the FSA. Particular reference was made to the FHRS and guidance and lessons identified from this will be incorporated into the At A Glance Scheme. Contracted social science research will commence shortly to gauge consumer needs and opinions on the At A Glance Scheme concept. Progress to be reported to the Board in December 20.</p>
<p>Action 8 - (FSA 20/01/14) Risk Analysis Process: Update</p>	<p>To consider triaging of issues to ensure that the AFFF achieved the Board's original intentions, and to revert to the</p>		<p>Rebecca Sudworth <b>In progress</b></p> <p>This will be covered in the report to the Board in September on the Risk Analysis process and readiness for the end of the transition period</p>
