7767388	by Sainsbury's Basics x 15 egg	Best Before 1 st Nov 2020	1UK15270

It has been brought to our attention that Salmonella has been detected on a farm supplying a limited number of batches of Sainsbury's eggs. This may make some of the eggs from the batches listed above unsafe to consume raw or lightly cooked. No other products are affected. Eggs with the same date code, but a different batch code are also unaffected. The best before date and batch code are printed on the

eggshell. These batches were only sold through specific Sainsburys stores in London and the South. For a full list of stores please follow this link: <https://help.sainsburys.co.uk/help/product/CSABysainsburyseggs>

Whilst the eggs are safe to consume if cooked thoroughly and handled correctly, customers wishing to return the affected batches to their nearest Sainsbury's store may do so and will receive a full refund. Only a very small number of eggs may be contaminated with Salmonella. If you have consumed these codes and are concerned you may have symptoms, please contact your GP.

For any concerns or questions regarding this, please check our website [Sainsburys.co.uk/help](https://www.sainsburys.co.uk/help) or contact our Careline on 0800 636262

We would like to apologise for the inconvenience this may cause.
