

**Dear Consumer – ref product recall – Country Hunter RAW Turkey nuggets BBD 13/12/17 –
Production date September 2016.**

In September 2016, Natures menu produced a batch of 900 bags of Turkey Country hunter RAW nuggets. 280 bags were sent to Norway. 600 individual bags have been distributed in the UK.

The Norway authorities have sent one bag of the product away for testing and it has come back with a positive result test for Salmonella. Whilst salmonella is known to make humans sick if ingested, it is also known that dogs and cat's digestion is designed to eat raw foods. Natures menu takes responsible raw feeding extremely seriously and is supporting the FSA with the recall of any bags of food left in circulation as a complete precaution.

If a consumer has product with this code which they would like to return, please e-mail customerservices@naturesmenu.co.uk and we will be happy to collect the product and refund your purchase.

Thanks

Natures menu
